## Examples of blended learning

TARGET GROUP	All
FORM	Guide
TIME NEEDED	Variable
LEVEL	Course and programme

### Background

Good examples are infectious. You can learn from a good example, and this is true for a successful intervention as well as a failed one. Examples of blended learning in practice are inspiring and can give quick insight into what it looks like. This helps in designing blended learning within your own educational context. The focus of this product is therefore on examples.

### Method

The product is a guide containing a short theoretical introduction to good examples and how best to work with them. A good example may not always be directly applicable in your own practice. It then describes how to collect good examples from within your own institution, followed by an overview of examples shared online.

Read through the guide, look at the examples and draw inspiration from them. Or start collecting your own examples within your specific context.

### If you would like to find out more, see the following (in Dutch):

*The Acceleration Plan for Educational Innovation with ICT is a four-year programme focused on bringing initiatives, knowledge, and experiences for digitalisation together. The programme is an initiative of SURF, the Netherlands Association of Universities of Applied Sciences, and the Association of Universities, and is organised in eight acceleration zones. In the zone Facilitating professional development for lecturers, 16 institutions are working on improving the professional development of lecturers in Dutch higher education.*
